SUMMARY

My primary focus is learning and leveraging new technologies to build optimal solutions to real-world problems. I value elegant, minimalist design that delivers an effective user experience and have a passion for bringing innovative ideas to life.

EDUCATION

Bachelor of Science in Computer Science, CSULB - May 2018

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer / Consultant

Contract Consultant for FRM - April 2026-Present

- Restored deployment confidence for Hero Builder with rollback runbook, PR quality gates and AI-assisted review standards
- Stabilized Jest/RTL (React) and Pytest (Flask) suite to fully green, adding ~290 tests while shipping features and bug fixes

Software Engineer II

Ambry Genetics, Aliso Viejo, CA - May 2025 - April 2026

Contributed as a full-stack engineer across multiple teams, delivering features for variant analysis and reporting

- Modernized/iterated on internal service to integrate databases and apis to support genetic counselors in variant curation
- Collaborated on a greenfield initiative to process and curate variant data via VCF files, API integrations, and data pipelines
- Technologies: Typescript (React), Symfony (PHP), Spring Boot (Java), PostgreSQL, Docker, AWS

Founding/Lead Software Engineer

Fluid Resource Management / Hero Services, Arroyo Grande, CA - October 2020 - May 2025

Architected and built Hero Builder™ from scratch (web + mobile) for compliance, maintenance, and operations across water/wastewater facilities; led UX, development, and a small team through production launch and ongoing support.

- Platform supports 150+ facilities, 50,000+ compliance records, 99% uptime since 2022, and 1,100+ completed checklist submissions/month in steady-state production
- Reduced client onboarding from 3-4 weeks to 1-2 days via multi-tenant enterprise accounts, reusable facility templates, and self-service configuration; migrated operators from paper/Excel to centralized digital workflows
- Designed multi-tenant, microservices architecture on AWS (React, Flask, PostgreSQL, Redis) with isolated environments for enterprise clients (e.g. operations and OEM partners)
- Implemented WebSocket-based resource locking to prevent concurrent edit conflicts and data loss
- Built Hero Builder Mobile (React Native) for field operators to complete tasks on site
- Technologies: TypeScript (React, React Native), Python (Flask), PostgreSQL, Redis, Docker, AWS, Cypress

Software Engineer

Sunrise Integration, Hollywood, CA - September 2019 - October 2020

- Contributed to 2.0 Launch of proprietary software, Warehouse Connector, by transitioning to a Vue-based frontend
- Iterated on API features, supporting high-volume data workflows/integrations across eCommerce platforms
- Handled data migrations between eCommerce platforms. (Ex: migrated +20K Customers and +16K Orders from Big Commerce to Shopify)
- Technologies: JavaScript (Vue), PHP (Laravel), MySQL

Full-Stack Developer

PXL Agency, Downtown Los Angeles, CA - July 2016 - May 2019

- Led frontend development for Paramount web app, featuring sorting and filtering of 1000+ movie archive
- Supported movie licensing to international clients in New Regency's CMS and client portal
- Worked on a new DreamWorks Animation company website which showcased their extensive movie catalogue
- Technologies: JavaScript (Vue, Ember), SASS, PHP (Laravel), SQL
